GPRRA Thanksgiving Match - November 17, 2020

Dear Great Pyrenees Friends,

It's almost Thanksgiving and we're much closer to our goal. We just need another great week like last week. Please help if you can. Each week we will share one of the many stories that are typical of our rescues throughout the year. This week's story is about Kimber, the puppy with the birth defect.

Kimber's story

When Kimber, now known as Kimmy made her way to GPRRA in April, we knew she was a special "one of a kind" kind of girl. She arrived with what we thought was an injury to her front foot. When she was examined by the vet, it was determined her actual bone was pressing on the fragile skin and she was in significant pain. X Rays were done and determined this was a deformity she was born with on her front left paw. Due to her not getting any medical treatment, an ulcer was created and a deep infection to her skin. The Vet and the foster created a medical boot for her to wear while they were treating the infection and helping the thinnest part of her skin have time to heal and thicken. The foster had to continue with boot changes a few times a day and ensuring to keep her comfortable. It wasn't a few weeks later when Shawna, the Adoption Coordinator, contacted the foster that there was a family that was very interested in Kimber.

This special family adopted Kimber a short time after her intake with GPRRA. Their desire to adopt her was a combination of them wanting to adopt a young pup to grow up and help with their miniature farm and to give a home to a PYR who may not be adopted easily. Kimmy looked so timid and sad in her original pictures that we knew we had to offer to give her a place to call home. Her injury to her foot, for them, was not a problem. They found out quickly that she is extremely resilient and unstoppable. She runs like she doesn't have a disability and plays just as confidently as her PYR brother.

Please help create more happy ending like Kimmy's and remember every dollar is matched.

Thank you.

John,
GPRRA President and Founder
